PROFESSIONAL SUMMARY

Results-driven CS graduate with hands-on experience in production Android apps, backend systems, and AI-powered automation. Proficient in Kotlin, Java, Python, Spring Boot, and Firebase. Fast learner who independently ships full-stack features across sprint cycles, with a strong foundation in REST API design and scalable architecture.

WORK EXPERIENCE

Android Developer Intern — MindMatrix Pvt. Ltd., Bengaluru

2026

Built and shipped Android UI features with Firebase Realtime Database integration; owned tasks end-to-end across sprint cycles with consistent delivery.
Used Google AI Studio and Antigravity AI to accelerate debugging and cut boilerplate, boosting development velocity significantly.

PROJECTS

Vidyarthi Bus — Student Transport & Bus Management App

2026 — Internship

Kotlin · Firebase Realtime Database · Android Studio · OpenStreetMap

Real-time bus location streaming and ETA via Firebase; clean 2-screen OpenStreetMap UI requiring zero user onboarding.

Swift Meet — Smart Appointment Planner

2025

Python · Firebase Realtime Database · Google Calendar API

Eliminated double-bookings via intelligent slot scanning and auto-suggestion; real-time Google Calendar sync with instant Firebase confirmations.

Automation AI — IT Support & Testing Automation Platform

2026 — In Progress

Java · Spring Boot · Firebase · REST APIs · Postman

AI-driven platform automating IT tickets, access management, and test execution; Spring Boot REST API built end-to-end with modular architecture.
